

E-commerce Website Proposal for a Musical Instrument Store

A focused online store setup to help the client showcase instruments, accept orders, and manage product updates with a smooth mobile-friendly shopping experience.

PREPARED FOR	DATE	TIMELINE	QUOTATION
Salt Musical	19 July 2026	1 week	NGN 250,000

Project Overview

This proposal covers the design and development of a modern e-commerce website for a musical instrument business. The goal is to give the client a professional online storefront where customers can browse products, view details, add items to cart, and complete orders confidently.

Scope of Work

Clean homepage and branded storefront design	Product catalog with categories for instruments and accessories
Individual product pages with images, pricing, and descriptions	Shopping cart and checkout flow
Payment gateway integration	Order notification and inquiry handoff
Mobile-responsive layout for phone and tablet users	Basic admin setup for adding or updating products

Deliverables

What the client receives	A live e-commerce website, branded interface design, core store pages, responsive build, payment setup, product management support, and deployment assistance.
Recommended content to provide	Business logo, product images, item descriptions, prices, delivery rules, and the preferred payment account or gateway details.

Investment

Total Project Fee

NGN 250,000

Covers design, development, store setup, and launch support for the agreed scope.

Suggested payment structure:

70% upfront to start

30% on completion before handover

Commercial Notes

- Quotation assumes one standard e-commerce website for a musical instrument business.
- Domain, hosting, SMS costs, premium plugins, and third-party subscription fees are billed separately where needed.
- Timeline depends on timely feedback and complete product content from the client.
- Reasonable revisions are included during the build phase before final approval.

Next Step

Once the client approves the quotation, Logic Leads can confirm kickoff, collect the initial payment, and begin the store structure, product setup, and interface design.
